

Doselec 50 SEL

Why?

Water is the main feed that is ingested by animals and can therefore be used to receive and carry essential supplements necessary for the good working of your farming. These solutions prevent or cure pathologies and sanitary problems which could cause huge shortfalls.

How?

The precise dosing is made thanks to the DOSELEC 50 SEL which injects your products strictly proportionally to the water flow. The pump's driving is done from a volumetric water meter pulse.

Technical characteristics

Model	DOSELEC 50 SEL
Outflow (water)	1 to 1000 litres/hour
Pump outflow	50 litres/hour
Dosing	From 1 to 5% at 1000 L/h (10% at 500 L/h)
Supply	220 Volts
Dosing control	<ul style="list-style-type: none"> > Swivel index showing the water meter working > Water meter with totalizer (in m³ and litre tenth) > A sample tap to check the injection priming (the VOLUMATIC has a manual ON position) > A digital display optional with reset indicates the water quantity drunk by animals during the treatment and as a result the active products amount taken from the stock solution
Accessories	Mixer container including: <ul style="list-style-type: none"> > A food grade polyethylene (40, 100 or 250 litres) > A motorized agitator with or without timing (according to the models)
Multidose option	Additional switch with pre-setting for working at low doses

Parts and labour work guaranteed for 1 year
