

Agito mixer containers

Agito 100

Agito 40

Why?

AGITO mixer containers constantly homogenize the stock solution, especially for "powder" products and prevent deposits. The solution stays in suspension and does not settle.

Equipment

Dixo mixer containers are composed of:

- a food-grade polythene container
- a 316 L stainless steel motorized agitator (PVC option on request)
- a driving reducer with slow rotation

Technical characteristics

Model	AGITO container
Capacity	40 or 100 litres
Energy	220 volts
Safety	Motor with integrated thermal security system
